

# Scrap Return Program

cerrowire®

**We manage your copper scrap,  
You get more money per  
copper pound.**

## Steps:

- 1.** Begin collecting copper building wire scrap.
- 2.** When a shipment is ready (*based on what is convenient for you; there is no minimum*), contact Heather Spano (800-969-2922 ext.377) at Cerro Wire to initiate return. At this time Cerro Wire will lock in the spot COMEX copper price as the base for the return transaction.
- 3.** Ship the container freight prepaid to the location provided.
- 4.** After the yield has been verified by the scrap processor, Cerro Wire will issue a credit memo at the previously locked in COMEX copper price minus a \$0.35/lb. processing and reclamation fee. (*This will take 30-45 days after shipment.*)

## Terms and Conditions:

- Do not send any metals other than copper.
- Send only building wire.
- Do not send any wire or cable that contains: aluminum, tin, armored coax, lead, fiberglass, or telephone wire.
- Do not send any reels or packaging materials.
- Please contact Cerro Wire if a container to collect the scrap is needed.
- Contamination of the scrap by any of the above materials will increase the processing and reclamation fee and be paid by the scrap producer.
